Gable and Flat Roof Shed Accessories

Shelf brackets

Hangs up to three shelves, 300mm deep. These hang from the wall to allow maximum use of valuable floor space. *(brackets only - shelving not included).*

Tool racks

6 racks and 2 wallstrips. Keep those tools off the floor!

Floors

Every shed needs a floor. We offer kitset wooden floors for all sizes of shed. All timber is treated to sit directly on the ground. Wooden floors will need pegging into the ground in windy areas.

Flat floor clamp

For existing flat concreted areas using dyna-bolts. *(Bolts need to be ordered separately).*

Recessed floor clamps

For specially poured concrete floors. We recommend the recessed concrete floor system as it provides greater protection from wind lift and moisture entering under your shed. *(Pre-bent bolts available separately).*
