FLOOR -** Easy to relocate, quick to
install & gives added rigidity

HI TENSILE .30 GAUGE STEEL - Deep
ribbed for strength and good looks

15 YEAR CLADDING WARRANTY - Peace
of mind assurance for you

SUPERIOR NZ MADE QUALITY

When you invest in a Smart Store shed, you are investing in a New Zealand made quality product that you can rely on. Manufactured on home turf means that the product is suited to New Zealand conditions. Further to that, only the best of materials are used, from NZ grown timber through to premium hi-tensile steel and quality fastenings.

Keeping Kiwis in jobs plays an important role in our community and gives the added assurance of controlled quality during manufacture, coupled with a locally backed warranty - we'll be here if you need us!

NEW ZEALAND
MADE

STRONGER SEMI-TIMBER FRAME CONSTRUCTION

The Smart Store shed has a unique easy-to-build panel assembly system using timber top & bottom plates. This provides extra strength and rigidity and is superior in strength and versatility to other non-timber reinforced sheds.

All timber is sourced locally in NZ and treated to H4 standards for all areas where there may be ground contact.

With a timber base plate, fixing the shed down is a dream, and now with a roof securely attached to the top frame using galvanised weather seal nails, it's not going to blow away in the first puff of wind either.

ANTI-RUST STEEL CLADDING

Smart Store sheds feature a hi-tensile, deep ribbed 0.30 gauge steel cladding. Roll-formed in our factory in Hamilton, New Zealand, it is available in a classic non-rust Zinc/Aluminium finish, or your choice of three popular colour options (See below). For your further peace of mind, the Smart Store Shed is backed up by a full 15 Year Warranty on all steel cladding. (Conditions apply)

LICHEN

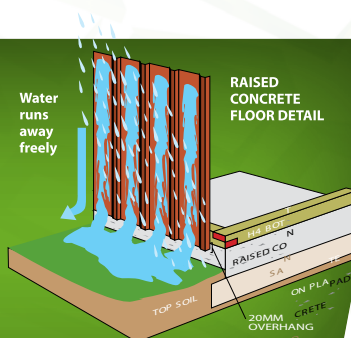

MIST GREEN

Roll-formed right here in New Zealand, the steel cladding is available in a classic non-rust Zinc/Aluminium finish, or your choice of three popular colour options.

ADVANCED WATER RUN OFF

As with all buildings, it is important that water flows away from your garden shed. Trapped water can potentially allow water ingress and then ultimately, corrosion of the steel cladding. Unlike many other sheds, the Smart Store Shed does not have steel channels at the base of the wall. This allows water to drain away unimpeded.

Further to this, when mounting your Smart Store Shed on a raised concrete floor pad, the assembly can be done in such a way that the steel wall sheets overlap the concrete floor for ultimate weather proofing. Further info on this in the Assembly Instructions.

EASY TIMBER FLOOR KITS

Optional timber floor kits are a good way to create a clean, dry platform up off the ground for storing your valuable gear on. Smart Store floor kits work differently to most other garden shed floors. The floor is fixed inside the shed on the timber bottom plate, creating a strong base for the shed.

The Smart Store floor kit contains all the materials that you will need including H4 ground treated joists and floorboards (cut to size) as well as the hardware required.

CLEAR ROOF PANELS

The double sided clear roof panel provides UV free natural daylight for your Smart Store garden shed or Workshop. It includes two single clear roof panels to cover both sides of the central ridge beam for additional light. This clear roof panel is ideal for the larger garden sheds or for those who are using their garden shed as a work space. Please note that clear panels may condensate more than steel.

SKILLION ROOF

AGAINST THE HOUSE? AGAINST THE FENCE?

The Smart Store Skillion series has a roof that slopes to the front enabling it to sit hard against fence or house wall. The perfect space saving solution for storing a large range of household items.

ACCESSORIES

TIMBER FLOOR KIT

Pre cut 150 x 19 mm H3 treated boards. H4 Bearers. Nails included.

CLEAR ROOF PANEL

Clear roof panels provide UV free, natural daylight. Please note that clear panels may condensate more than steel.

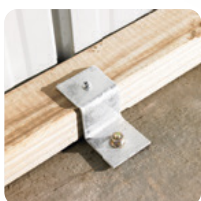

PEG DOWN KIT

Used to anchor your Smart Store shed down to sand or dirt substrates. Kit includes 6 x H5 pegs and stainless steel. Tools required; Sledge hammer and screwdriver.

HEAVY DUTY WORK BENCH

Lock together construction with 250kg load rating per shelf. Size: 1.14m W x 0.50m D x 0.90m H.

BOLT DOWN KIT

The Smart Store Bolt down kit is used to mount your shed securely to a concrete base. Contains a unique bracket which tightly clamps the base plate to the concrete floor.

5 TIER SHELF UNIT

Bolt free interlocking kitset. MDF shelves, 350kg load rating per shelf. Size: 0.90m W x 0.40m D x 1.80m high.

BATTERY POWERED SHED ALARM

(Model DSA-MA20)
Intruders beware!

- Ultra loud 130db alarm
- Easily attached to the timber framing
- Uses 4 x AA Batteries (not included)

TOOLS REQUIRED

Drill

Riveter

Tape measure

3.5mm Drill bit

Pen

Phillips Drill bit

Nail punch

Hammer

Step Ladder

Optional extras incur freight charges when ordered separately. Imperial dimensions are rounded and are as a guide only. Timber floor kits, where shown, are purchased as an optional extra.
