A BETTER WORLD WITH KETER

For the past 70 years, we have been a world leader in resin-based products, and we take that responsibility very seriously.

We believe we can encourage sustainable consumption through the use of reusable plastics and by extending the life of our products. This includes ensuring that our operations, from material and design innovation to manufacturing processes, are undertaken responsibly.

As a business, we are focused on the following:

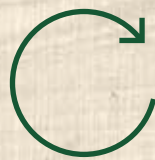

Recyclability & Recycling

We design for 100% recyclability. We use post-industrial and postconsumer waste as a source of raw material.

Responsible Manufacturing

We invest in process efficiencies and taking steps to minimize our operational footprint. Many of our factories use solar power and are fully automated, reducing labor and electricity.

Designed to Last

We don't believe in single-use plastic products. Our products are designed to last for years. We want all our products to have minimal impact on the planet.

Community

We are respectful and work to promote diversity within Keter. We are involved in volunteer activities in the local communities.

DUOTECH™

MY SHED

If you can dream it, you can do it

Imagine the personal space you have always wanted. Somewhere you can go to wind down after a long day, get energized to tackle a big project or indulge in a favorite hobby. An art studio, massage therapy clinic, DIY workshop, music room, even a backyard office for your growing business. Imagine a place, just steps away from home, created by your own two hands and fully customized by your endless imagination.

Paint it and make it your own. Dream it, create it.

My Shed comes with white traditional style window frames.

Decorate and style to suit your lifestyle.

Additional living space for teens or a playspace for children.

My Shed comes with window boxes for that homely feel.

Customise your interior space to suit your needs.
