LIFESTYLE RANGE

Designed to meet the needs of a range of Kiwi lifestyles, the Duratuf Lifestyle Range is the ultimate in stylish, secure storage. With models that suit high density suburban living to sprawling country estates you're sure to find one that fits your requirements.

Made right here in New Zealand from quality materials and components by our team with over 25 years of kitset building experience, a Duratuf Lifestyle shed is a worthy investment that'll pay off for decades to come.

Features at a Glance

Engineer Approved

The Duratuf Lifestyle sheds over 10m² have been reviewed and certified by a chartered professional engineer. This means you do not need building consent to build one, provided you meet any other local council regulations.

No Permit Required Under 30sqm

Building a garden shed that is under 30 square meters in size does not require a permit, offering you a straightforward solution for adding extra storage space to your property. This means that homeowners and DIY enthusiasts can construct a shed of this size without having to obtaining a permit.

Timeless Design

Horizontal corrugate cladding and wide gauge box flashings create a modern yet classic design aesthetic that looks striking on any landscape.

Generous Headroom

An impressive stud height means even the tallest loose forward won't go bumping their head. More importantly, it gives you much needed extra space on a smaller footprint, and allows you to store tall items and other gear in a space-saving vertical position.

Superior Weatherproofing

Water is the last thing you want inside your shed. So while other brand sheds have steel channels that allow it to pool and corrode, Duratuf Lifestyle sheds have effective flashings to stop it getting in, and spouting to make sure it moves on quickly, either down the drain or diverted to a water tank or rain barrel.

(Downpipe kit required for Ponsonby and Fendalton models)

Secure Roller Door

High and wide so you can get everything inside. A quality New Zealand made roller door provides uninhibited access for larger items, while giving you peace of mind knowing your valuable gear is kept safe from theft.

Available in many popular colour options (see page 14), combine it with your preferred shed colour to create a colour scheme tailored to your property.

Structural Timber Framing

Like all Duratuf sheds the Lifestyle Range features a robust timber frame. This not only gives them a solid structural backbone, in addition it does away with the need for steel channels that invite leaks and corrosion. Plus it gives you plenty of options when it comes to hanging up tools, or adding shelves and workbenches.

All timber is machine gauged, appropriately treated, and sourced from renewable New Zealand pine forests. Roof beams are hi-span laminated structural beams for the ultimate in strength and durability.

Solid Steel Cladding

Not only does it look great, our hi-tensile 0.4mm Armoursteel steel cladding with multi-layered paint coating is tough enough to resist even New Zealand's most extreme weather conditions. We're so confident that we back it up with a 30 year guarantee.

Available in many popular colour options (see page 14), combine it with your preferred door colour to create a colour scheme tailored to your property.

A big 6m wide, and about as close as you'll get to the 30m2 limit.

Base Dimensions	
Width	Depth
6.000m	4.800m

Door Width Options	
2.400m	3.000m
Door Clearance Height	
2.070m	

Optional upgrades

Add PA Doors or Windows

A Pedestrian Access door (810mm W x 1920mm H) and fixed or opening aluminium joinery window (970mm W x 520mm H) can be added in multiple locations on your Lifestyle shed.

Automatic Door Kit

Access your Lifestyle shed at the click of a button with the remote controlled automatic door kit. A popular addition for those wanting complete convenience.

Clear Roof Panel

Enjoy natural daylight in your shed without the harmful effects of UV rays, thanks to the clear roof panels. These panels are designed to integrate seamlessly with the steel roof sheet, and are available as an optional upgrade for any Lifestyle shed.

Coastal upgrade

Because we are so confident in the quality of our cladding, we back it up with a 30-year warranty in non-coastal regions (*conditions apply*). For those sheds in coastal areas, we also offer a high-durability grade of cladding option for your peace of mind. With an extra thick layer of zinc-aluminium protection, our Coastal grade cladding provides enhanced resistance to the harsh conditions in New Zealand's coastal environment.

For full details of our Coastal Upgrade Option, refer to www.duratuf.co.nz/duratuf-warranty.

Very High Wind Upgrade Kit

Built with safety, strength, and durability in mind, the Lifestyle shed range has a timber-reinforced heavy-duty construction, engineered to NZS 3604 High Wind Zone specification. The Lifestyle shed can withstand most of Mother Nature's wear and tear, but for those Very High Wind Zone areas, we offer a NZS 3604 Very High Wind Zone shed upgrade kit. **For more information regarding wind zones, visit the Branz website:** <https://www.branz.co.nz/branz-maps-zones/>

Snow Load Upgrade Kit

Live in New Zealand's high country where snowfalls are regular? We have you covered with a NZS 3605 standard 1 kPa engineered load rating on all our Lifestyle sheds. However, for those higher elevation areas with severe snow, the Snow Load Upgrade Kit is a perfect addition to your Lifestyle shed, with a 2kPa upgrade Snow Load kit option to suit NZS 3604 standards, reinforcing the sheds inner roof structure. **For a NZ snow load map visit:** https://www.level.org.nz/fileadmin/downloads/Site_Analysis/Snow_Zones_Map.pdf

Colour Options

You can choose any combination of shed and door colour.

With a wide range of popular cladding colours you're sure to find a colour scheme to match your property.

Similar to FlaxPod®

Flooring Options

While the Ponsonby and Fendalton models are able to sit on an existing substrate like a driveway, deck or patio, all other models are designed to sit on a purpose built raised floor. As the cladding overhangs the bottom framing by 30mm to eliminate water ingress. We can provide this with our Plywood or Timber Floor Kit, otherwise you can lay a concrete pad or fabricate something to suit.

Note: Models over 10m2 require a concrete slab that meets the NZ Building Code to be compliant

Plywood Floor Kit

Includes cut to size 17mm H3 plywood sheets, ground treated H4 joists, treadplate doorway flashing and all required hardware.

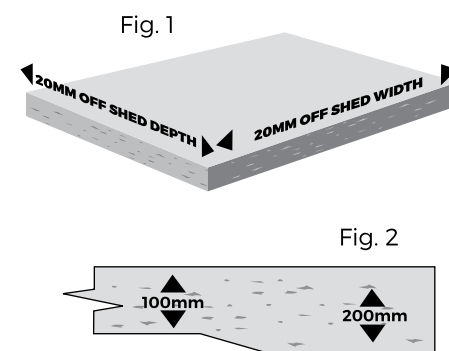

Timber Floor Kit

Includes cut to length thick gauge H3 timber floorboards, ground treated H4 joists, treadplate doorway flashing and all required hardware. (floorboards supplied in separate pack from main kitset)

Building A Raised Concrete Base

- Step 1** - Establish size of shed and excavate sufficient area. Remember to allow for roof overhang of 150mm on the back wall and 50mm on the side walls.
- Step 2** - Ensure that the base substrate is compacted firmly. The concrete slab should be 100mm thick in the middle and 200mm thick around the edges (Fig 2).
- Step 3** - Lay boxing to the required size. Check the base is square and the diagonal measurements are equal. The raised slab size should be 20mm smaller than the overall base size of the shed and at least 50mm above the ground line. (Fig. 1)
- Step 4** - Lay plastic sheeting under slab to prevent moisture coming through from underneath.
- Step 5** - Pour concrete and screed flush.

Accessories

Clear Roof Panel

5 Tier Shelf Unit

Automatic Door Kit

Downpipe Kit**

*For fixing Ponsonby/Fendalton to ground or loose substrate
** Required for Ponsonby/Fendalton only. All other models have PVC downpipes as standard.

Shed Alarm

Heavy Duty Workbench

Assembly Options

Lifestyle sheds are a great project for a competent DIYer, otherwise we recommend hiring a builder or an assembly service. Visit Duratuf.co.nz to view our recommended assemblers.

Tools Required

Kitset Pack

Lifestyle sheds are delivered in a single crate as a ready to build kitset and come with comprehensive assembly instructions.

If ordered with a Timber Floor Kit this will be packaged separately.
